RESEARCH

Grants and Contracts (past 5 years)

Funded

Co-Investigator, Understanding barriers and facilitators to enrollment of adolescents and young adults onto cancer clinical trials at NCI Community Oncology Research Program sites. NCORP Children Oncology Group Grant, PI: Roth, M. 09/01/2018-08/31/2018.

Major Goals: The goal of this study is to describe barriers to AYA enrollment onto cancer clinical trials at NCORP sites and determine specific barriers which can be targeted with an intervention to enhance AYA enrollment.

Principal Investigator, Behavioral and cultural determinants of betel quid chewing, dependence, and withdrawal in Taiwan. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PI: Tami-Maury, \$99,581.00 (\$49,790.50/year), 11/01/2012-10/31/2014 (No-cost extension: 08/31/2019).

Major Goals: This project is collaboration between MD Anderson and China Medical University Hospital (CMUH) and seeks to characterize betel quid chewers and their withdrawal symptoms, in order to address an urgent cancer epidemiology issue in Taiwan. This application represents the first step in the development of a multi-phase, multidisciplinary betel quid chewing research program. This program will enhance understanding of the cultural and bio-

behavioral aspects of betel quid chewing.

Principal Investigator, Project COMET. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PI: Tami-Maury I, \$99,992.00 (\$49,996.00/year), 01/01/2015-12/31/2017 (No-cost extension: 12/31/2019).

Major Goals: To change tobacco culture and norms in the Instituto de Cancerologia (Medellin, Colombia), the Instituto Nacional de Cancerologia (Mexico City, Mexico), and the Instituto Nacional de Enfermedades Neoplasicas (Lima, Peru) by establishing institutional capacity to promote relevant tobacco cessation services integrated into oncology practice and by developing a cadre of well-trained health care providers in nicotine addiction who will continue to address comprehensive tobacco control strategies for cancer patients in Colombia and Mexico long after the study has ended.

Co-Principal Investigator, Project Quitting Schedule: Adapting and testing a smartphone application for Spanish-speaking cancer patients interested in quitting smoking. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PIs: Cinciripini P and Tami-Maury I, \$99,997.00 (\$49,998.50/year), 01/01/2016-12/31/2018.

Major Goals: To adapt a computer-based program that uses a progressive reduction in the smoking rate into a more-portable tablet/smartphone application (app) and to test this app among smokers diagnosed with cancer in Colombia and Mexico.

Principal Investigator, 10%, Project TNT: Tobacco cessation intervention for Lesbian, Gay, Bisexual, and Transgender smokers. The University of Texas MD Anderson Cancer Center Institutional Research Grant, PI: Tami-Maury I, \$74,957 (\$37,479/year), 07/01/2016-06/30/2018 (No-cost extension: 06/30/2019).

Major Goals: To test the feasibility of a novel tailored text-based approach for smoking cessation among sexual and gender minority groups.

Co-Investigator, Healthy Living after Cancer: Quality of Life and Health Behavior among Breast Cancer Survivors. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PI: Basen-Engquist K, \$99,357.00 (\$49,491 year 1, \$49,866 year 2), 03/01/2017-04/30/2019.

Major Goals: To understand Chilean and Colombian breast cancer survivors' quality of life issues, health behaviors and weight gain, while also identifying breast cancer survivors' preferences for receiving information and services related to physical activity, weight management, and nutrition, with an emphasis on their use of technology.

Co-Investigator, Tobacco-free teens in Brazil. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PI: Karam-Hage M, \$98,935.00 (\$49,286 Yr1; \$49,649 Yr2), 07/01/2017-06/30/2019.

Major Goals: To culturally and linguistically adapt ASPIRE, for Portuguese-speaking school-age children in collaboration with three MD Anderson Sister Institutions in Brazil (Barretos Cancer Hospital, Hospital Israelita Albert Einstein, and A.C. Camargo Cancer Center) as well as tobacco specialists from Portugal and Mozambique.

Principal Investigator, 40%, Project STOP, SWOG Tobacco program for Oncology Practice. SWOG/Hope Foundation Impact Award, PI: Tami-Maury I, \$249,995.00, 01/01/2018-12/31/2019.

Major Goals: To develop and test the feasibility of an eLearning program and an mHealth tool on brief tobacco counseling specifically designed for Spanish- and Portuguese-speaking cancer care providers.

Pending

Co-Investigator, 15%, Sexual and Gender Minority Cancer Curricular Advances for Research and Education (SGM Cancer CARE). PAR-15-150, NIH/NCI, PI: Shine C and Sanchez N, \$327,897.19, 07/01/2019-06/30/2021.

Major Goals: To design an up-to-date, useful, competency-based, modular workshop curriculum, which we have titled SGM Cancer CARE (Sexual and Gender Minority Cancer: Curricular Advances for Research and Education), for providing participants with knowledge and skills to begin conducting high-quality and culturally appropriate research to improve SGM care across the cancer care continuum.

Principal Investigator, 100%, Text2QuitPLUS, a text-based smoking cessation intervention for sexual and gender minority groups. PAR-18-367, NIH/NCI, PI: Tami-Maury I, \$576,583.92, 04/01/2019-03/31/2022.

Major Goals: To prospectively explore the feasibility of a tailored text-based intervention for smoking cessation targeting lesbian, gay, bisexual, and transgender smokers.

Consortium Principal Investigator, 8%, Standardized Modeling of Health Communication Constructs and Information Exposure within Online Interactions for Behavior Change. PAR-18-638, NIH/NCI, PI: Myneni S, \$957,801.00, 04/01/2019-03/31/2023.

Major Goals: To incorporate and integrate qualitatively-derived behavior-specific shared mental models (e.g. relating e-cigarettes to lung cancer), extensible ontology representations of behavior change mechanisms, communication semantics and structure, and metrics of information accuracy in the context of peer interactions in online social platforms.

Co-Investigator, 5%, Weight Control Intervention in Obese and/or Diabetic Adults with Liver Fibrosis. R01 – PAR-18-559. NIH. PI: Basen-Engquist K, \$2,406,165, 01/01/2019-12/31/2023.

Major Goals: The purpose of this study is to test the effects of a weight loss program on improvement of liver fibrosis in participants with obesity or Type II diabetes, with the goal of decreasing their risk of liver cancer.

Other

Principal Investigator, 100%, Tobacco prevention and cessation competencies for dental students in Latin America and the Caribbean, Financial support provided by the Halliburton Employees Postdoctoral Fellowship in Cancer Prevention and the Olla S. Stribling Funds, Behavioral Science, The University of Texas MD Anderson Cancer Center, 01/18/12 – 01/17/2014.

Major Goals: To identify the current perceptions of Latin American and the Caribbean dental faculty members regarding the tobacco use prevention and cessation competencies that should be addressed in the dental curricula, the

type of training expected and the available resources for this purpose.

Completed

Co-Investigator, ASPIRE International. The University of Texas MD Anderson Cancer Center Sister Institution Network Fund Grant, PI: Prokhorov, A, 7/1/2015-6/30-2017, \$99,865 for 12 months.

Major Goals: Partnering with Colombia, Mexico, and Peru MD Anderson Sister Institutions to culturally adapt and test a tobacco prevention and cessation program targeting Latino adolescents.

Co-Investigator, 12%, Informing Vocational Student about Risks of Using Electronic Cigarettes, Pilot Study for the project: Informing and Correcting Perceptions regarding Tobacco Products among Young Adults. Tobacco Center of Regulatory Science (TCORS) on Youth and Young Adults, PI: Calabro K, 9/1/2015-08/31/2016, \$19,732 for 12 months.

Major Goals: To assess whether delivering text messages communicating information about electronic cigarettes are more effective when framing is congruent with the recipients' regulatory focus goals. The results of this study will provide direction in communicating risks and adding to evidence that informs the Food and Drug Administration's policies.

Principal Investigator, Project: Non-invasive oral cancer screening among HIV smokers. Center for AIDS Research (CFAR), Baylor-UT Houston Developmental Mini-Grant Funding for Pilot Projects, PI: Tami-Maury I, \$14,998, 01/01/2016-07/31/2016 (No-cost extension: 07/31/2017).

Major Goals: To evaluate the use of a fluorescence light-based screening hand held device as a clinical adjunct to conventional oral examination among smokers in an HIV dental practice setting.

Co-Investigator, 5%, Youth Component Lung Cancer Control and Prevention Moonshot, MDACC, PI - Prokhorov A, 7/1/2015-6/30/2017 (\$286,599/year)

Major Goals: The goal of the Youth Prevention project is to develop feasible, effective and sustainable tobacco prevention and cessation intervention programs in educational and clinical settings that will lead to large-scale, practice-changing public health policies and guidelines. Our intervention studies are age-appropriate, culturally sensitive and impactful. The research team continually explores novel venues and systems to increase engagement in tobacco prevention among youth and families.

Co-Investigator, Combating Tobacco in the United States Army, W81XWH-09-2-0033, Department of Defense (DOD), PI - Prokhorov A, 4/1/2009-3/31/2016, \$2,450,000 (\$591,010/year)

Co-Investigator (Mini-Grant, PI: Saroha E), Postpartum Antiretroviral Therapy Adherence among HIV-infected Black Women, 1R25TW007501-01, NIH/Fogarty, Framework Programs for Global Health, PI: Ehiri J, \$4,000.00, 03/01/2007-02/29/2008.

Major Goals: To investigate adherence to antiretroviral therapy during post-partum period among a sample of HIV-infected African American women residing in the Southeastern US.

Co- Investigator, 100%, Antiretroviral Therapy Exposure in HIV Positive Pregnant Women and their Infants in the South, UAB Minority Health and Research Center Health Disparities Charles Barkley Award (2007), PI: Kempf MC, \$30,000.00, 02/01/2008-01/31/2009.

Major Goals: The aim of this study was to investigate the continuum of pregnancy and post-partum care with regards to clinical outcomes among HIV-infected women residing in the Southeastern US.

Co- Investigator (Mini-Grant, PI: Kempf M), Contextual Factors Contributing to Postpartum Antiretroviral Non-Adherence, 1R25TW007501-01, NIH/Fogarty, Framework Programs for Global Health, PI: Ehiri J, \$4,000.00, 03/01/2007-02/29/2008.

Major Goals: To assess the risk factors that negatively impact HIV care no adherence among a sample of HIV-infected postpartum women.

Principal Investigator (Mini-Grant, PI: Tami-Maury I), Adherence to antiretroviral therapy in in Bamako District, Mali, 1R25TW007501-01, NIH/Fogarty, Framework Programs for Global Health, PI: Ehiri J, \$4,000.00, 03/01/08-02/29/09.

Major Goals: To assess the adherence to ART and factors that impose barriers to antiretroviral adherence among HIV infected populations in Bamako District, Mali.

Co- Investigator, 100%, (Faculty Grant, PI: Wilson L), Middle range evaluation of Familias Fuertes parent/adolescent education program, Honduras 2008, 1R25TW007501-01, NIH/Fogarty, Framework Programs for Global Health, PI: Ehiri J, \$20,000.00, 10/01/08 – 09/30/09.

Major Goals: To evaluate the strengthening families (Familias Fuertes) intervention for parents and adolescents in Honduras.

Not Funded

Principal Investigator, 35%, LGBTQuit, a text-based smoking cessation program for SGM population. Research Scholar Award, American Cancer Society, PI: Tami-Maury I, \$790,380.00, 01/01/2019-12/31/2022.

Major Goals: To test the feasibility of using a text-based smoking cessation program among sexual and gender minority smokers, while in the process identify facilitators, barriers, and strategies for collecting data and reducing tobacco-related health disparities among sexual and gender minority groups.

Principal Investigator, 10%, Tackling childhood obesity in dental environments. Duncan Family Institute for Cancer Prevention and Risk Assessment Seed-funding Research Program, PI: Tami-Maury I, \$99,558.00, 01/01/2018-12/31/2020.

Major Goals: To identify and understand system-, provider-, and patient/parent-level factors associated with the success or failure of implementing interventions in dental environments that promote physical activity, weight management, and/or healthy nutrition among Texan children and adolescents.

Consortium Principal Investigator, 8%, Content-sensitive characterization of communication structure associated with online social interactions for tobacco cessation. PAR-16-249, NIH/NCI, PI: Myneni, S, \$957,801.00, 04/01/2018-03/31/2023.

Major Goals: To incorporate and integrate qualitatively-derived behavior-specific shared mental models (e.g. relating e-cigarettes to lung cancer), extensible ontology representations of behavior change mechanisms, communication semantics and structure, and metrics of information accuracy in the context of peer interactions in online social platforms.

Consortium Principal Investigator, 18%, Adapting and Testing a Text Messaging Program for Argentinian smokers living with HIV. PAR-17-086, NIH/Fogarty International Center, PI: Mejia, R, \$274,454.00, 10/01/2017-09/30/2019.

Major Goals: To adapt, tailor, and pre-test the feasibility of implementing a text-based smoking cessation intervention for current smokers living with HIV/AIDS in Argentina.

Principal Investigator, 75%, Medical Residents becoming Tobacco-Free Champions. PAR-17-002, NIH/Fogarty International Center, PI: Tami-Maury, I, \$673,153.00 (\$134,652.00/year), 12/01/2018-11/30/2023.

Major Goals: To reverse the tobacco epidemic in Argentina by assessing the feasibility of a smartphone-based intervention for tobacco cessation within the clinical environment of an urban university hospital.

Principal Investigator, 50%, Project ATLAS: Anti-Tobacco program for Latin American dental Students. RFA-TW-16-003, NIH/Fogarty International Center, PI: Tami-Maury, I, \$1,250,000 (\$250,000/year), 01/07/2017-06/30/2022.

Major Goals: To reverse the tobacco epidemic in Latin America by implementing a culturally and linguistically adapted tobacco prevention and cessation online training program and assessing the feasibility of a smartphone-based intervention for tobacco cessation within the dental environment.

Co-Investigator, 20%, Tobacco Free UT. RFA--R-17.1IIRAP, Cancer Prevention Research Institute of Texas (CPRIT), PI: Prokhorov A, \$74,957 (\$37,479/year), 12/01/2016-10/30/2019.

Major Goals: To test whether the experimental intervention, a website and educational text message delivery system, outperforms a publically available website offering standard care prevention and cessation to achieve abstinence from cigarettes and other new and emerging tobacco products. Consortium Co-

Investigator, 15%, Implementing and Expanding Tobacco Control Educational Programming for Underserved Middle School Youth in Southeast Texas, RFA--P-17.1EBP, CPRIT, PI: Morris C, \$1,342,992, 03/01/2017-02/29/2020.

Major Goal: Improve knowledge of tobacco's health risks and reduce intention to initiate tobacco use among low-income and rural middle school students in Southeast Texas, as well as to raise public awareness of tobacco-related health risks among rural, low-income and high-risk communities in the same region.

Principal Investigator, 75%, Project ATLAS: Anti-Tobacco program for Latin American dental Students. PAR-15-291, NIH/Fogarty International Center, PI: Tami-Maury, I, \$652,974.45 (\$130,594.89/year), 12/01/2016-11/30/2021.

Major Goals: To reverse the tobacco epidemic in Latin America by assessing the

feasibility of a smartphone-based intervention for tobacco cessation within the dental environment.

Co-Principal Investigator, 20%, Hooked on Hookah?, RFA-OD-15-005, NIH/NCI, PI - Prokhorov, A and Tami-Maury, I, 7/1/2016-6/30/2019, \$1,424,926 (\$296,526/year)

Major Goals: To assess the association of social media with hookah tobacco use among a national representative sample of US individuals aged 16 to 19 years old.

Consortium Co-Investigator, 20%, Implementing and Expanding Tobacco Control Educational Programming for Underserved Middle School Youth in Southeast Texas, RFA--P-16-PN, CPRIT, PI: Morris C, \$ 542,886, 12/01/15-11/30/18.

Principal Investigator, 10%, Project TNT: Tobacco cessation intervention for Lesbian, Gay, Bisexual, and Transgender smokers. The University of Texas MD Anderson Cancer Center Institutional Research Grant , PI: Tami-Maury I, \$74,957 (\$37,479/year), 01/01/2016-01/01/2018.

Major Goals: To test the feasibility, acceptability, and effect size of two different approaches for smoking cessation (LGBT-tailored vs. mainstream) among a sample of LGBT smokers

Principal Investigator, 15%, Project OPERA, Oral Photos for Enhancing a Referral Approach: GILEAD Sciences, Research Scholars Program in HIV, PI: Tami-Maury I, \$122,281, 07/01/2016-06/30/2018.

Major Goals: To test the feasibility and acceptability of a novel referral approach to the Texas quitline among HIV smokers seeking dental care.

Consortium Principal Investigator, 20%, Enhancement of Don't Smoke Your Life Away Anti-Tobacco Program for Youth, RFA--P-16-PN, CPRIT, PI: Templain N, \$ 542,886, 12/01/15-11/30/18.
